

# ◆ The Structure of Pre-need Agreement

(生前契約のしくみ)

2 different non-profit organizations (NPOs), namely Liss System and Japan Pre-need Agreement Settlement Organization, work together with each playing a different role. Their relationship is collegial and they collaborate with each other, keeping an eye on each other's operations and their future visions (reciprocity and mutual supervision).

## Their Roles

### ● NPO Liss System

NPO Liss System undertakes important obligations by signing notarized contracts with users. (the mandatory organization of voluntary guardianship contract and pre-need agreement).

### ● NPO Pre-need Agreement Settlement Organization

The Settlement Organization supervises and examines whether or not the agreed tasks between Liss System and its users are performed without fault. If it is performed as it should be, the Settlement Organization pays to Liss System for the jobs completed. It keeps the users' money on deposit to cover the expenses incurred when the user is sick, injured or die (the manager of the money on deposit).

The Organization executes the will after the user dies. (the executor of the will)
